Definition of Done
Lost And Found
Team Rocket
25 July 2018

Definition of Done (User Stories)
- ❖ All tasks for that user story are done.
- ❖ The user story has been inspected and accepted by the product owner and team.
- ❖ The project is ready for deploy and team members no longer need to touch it again
- ❖ The new code has been merged with the master branch, and still works alongside changes made by other team members

Definition of Done (Tasks)
- ❖ The code has been checked into our team's Github repository
- ❖ The new code has been merged with the master branch, and still works alongside changes made by other team members
- ❖ The code has been visually inspected by at least one other team member for:
  - ➢ Coding style consistency
  - ➢ Sufficient documentation
